Date

mm/dd/yyyy

Cancel

Add Expense

Filter by year

2020

Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec

August 2020 14

Toilet Paper

\$94.12

Functionalities of Expense Tracker

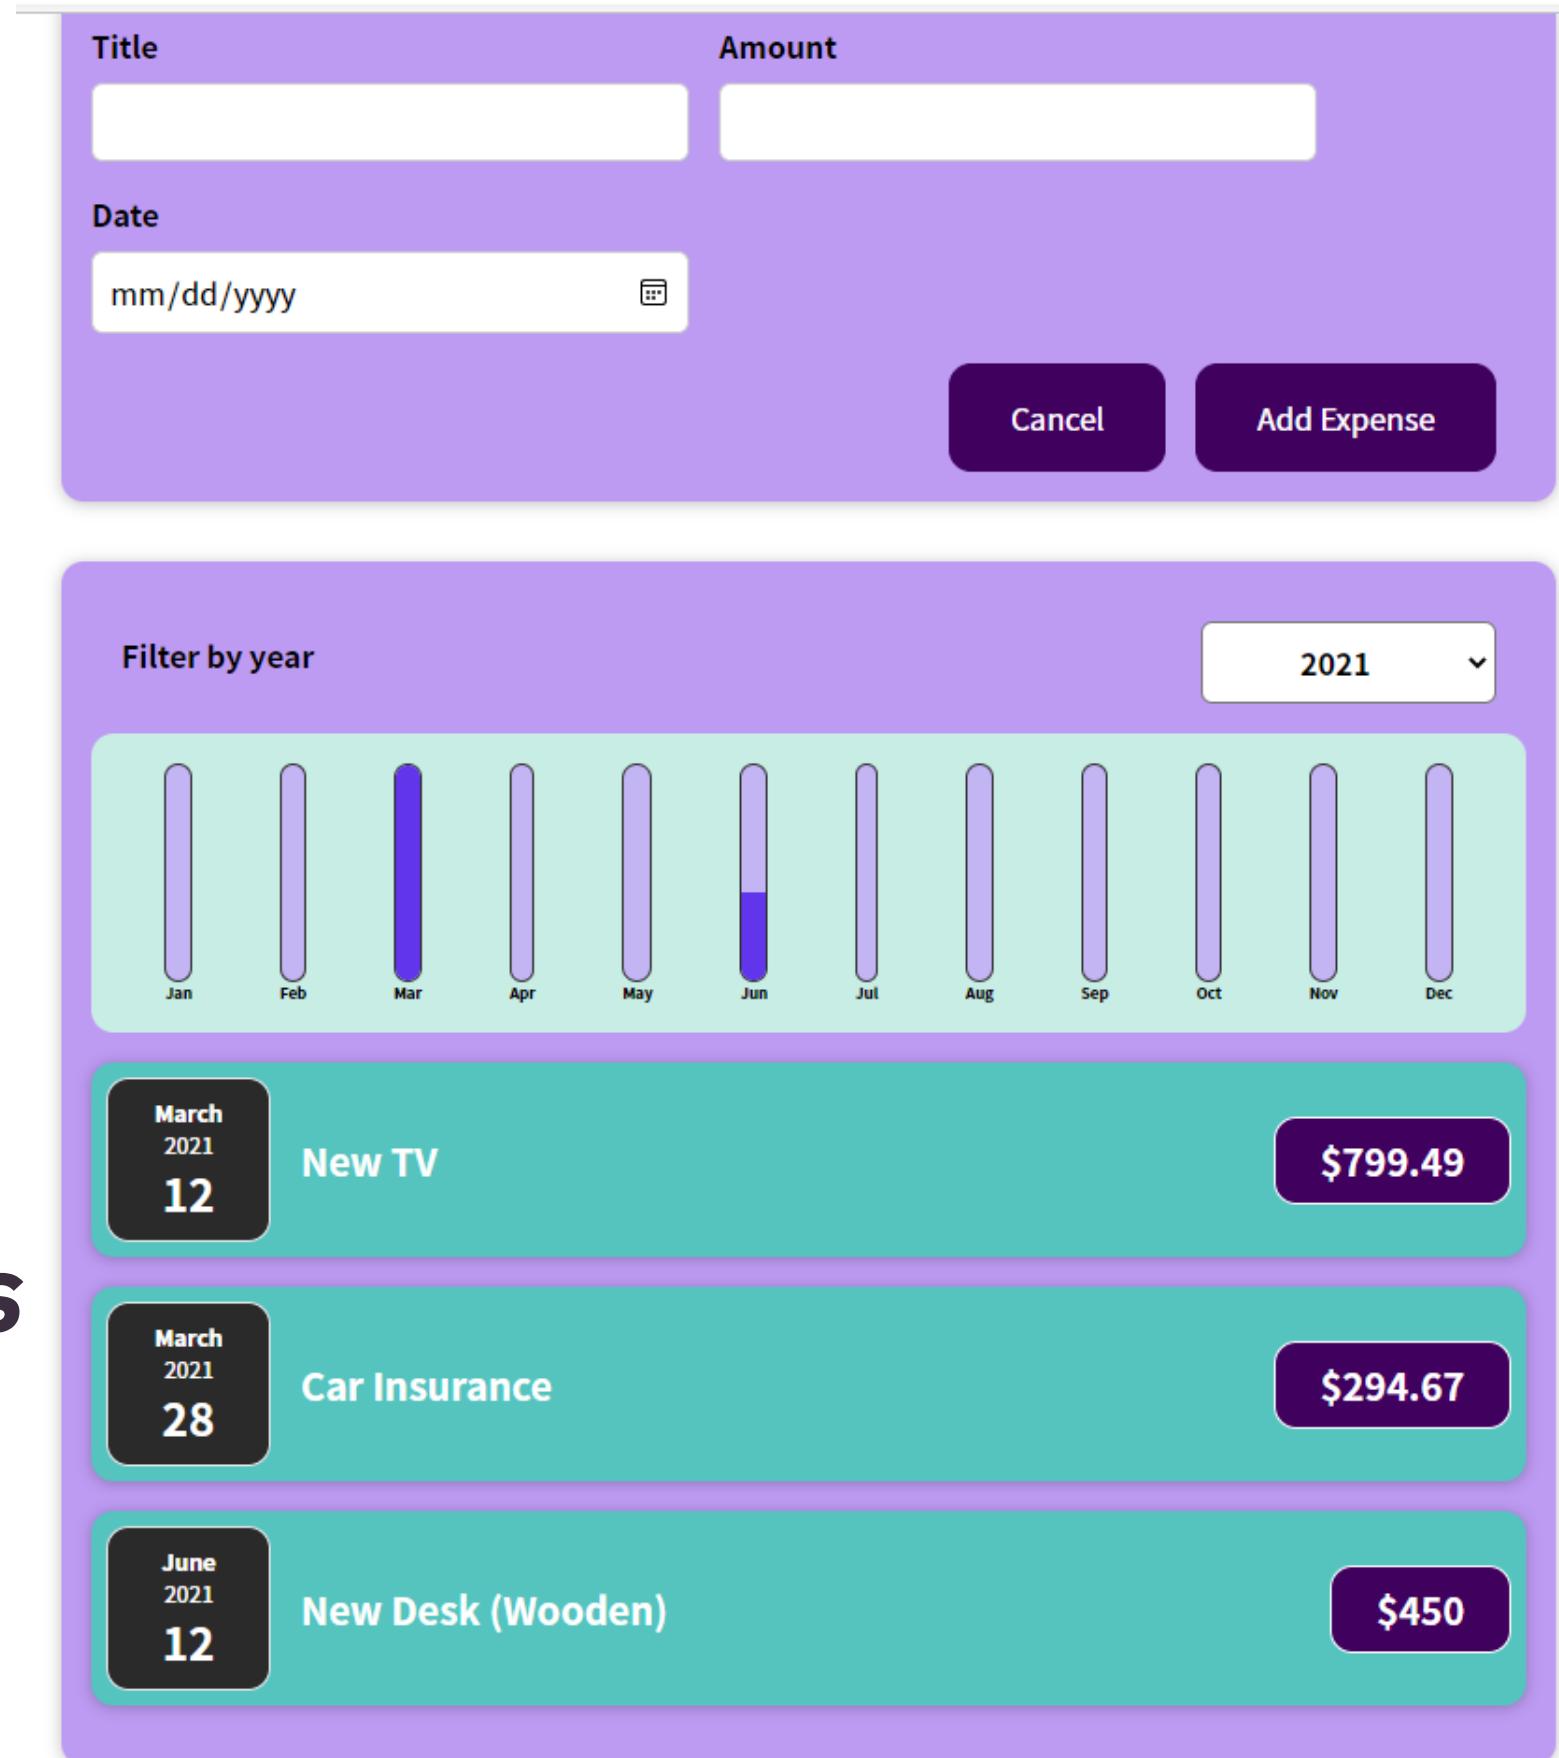

- 1.we can Add our expense by giving title and price and date***
- 2.we also filter our expense by the year filter***
- 3.we have chart bar also which has filled as expenses filled at specific year***
- 4.Chart bar empty if expense of that year is blank***

The screenshot shows a user interface for an expense tracker. At the top, there is a purple modal dialog titled "Add Expense" with fields for "Title" (a text input), "Amount" (a text input), and "Date" (a date input). Below the modal is a main content area with a purple header "Filter by year" and a dropdown menu set to "2022". A horizontal timeline below the dropdown shows vertical bars for each month from January to December. At the bottom of the main content area, a message reads "Found no expenses."

If we have no expense at any year so it shows no expense found that is also dynamic

CHART BAR FEATURE

when Entries filled then automatically bar chart rises for specific month of the year as we can see that here for march of 2021

TECH USED

**we used React js for this expense tracker project in which
we use the following features of the react**

- 1.useState hook
- 2.useEffect hook
- 3.dynamic css
- 4.function based components

Thank
you!
